Art Unit: 3762

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28, drawn to a guiding device having coupling for engaging and electrode assembly, classified in class 607, subclass 122.
 - II. Claims 29-38, drawn to a method of positioning electrodes, classified in class 128, subclass 898.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be used with a different guide and electrode assembly in which the electrode assembly is not slidably engaged with the guide.

3. This application contains claims directed to the following patentably distinct species of the claimed invention: Species I - figure 1a

Species II - figures 1b - 1e, 2, 3

Species III- figure 9

Species IV - figures 10 -11

Species V - figure 12a

Species VI - figure 12b

Art Unit: 3762

Species VII - figures 14a, 14b

Upon the election of one of the above species that is with a guide rail, the examiner requires a further election of subspecies of guide rails

Subspecies A - the guide rail connection of figure 1

Subspecies B- the guide rail connection of figure 7a

Subspecies C - the guide rail connection of figure 7b

Subspecies D - the guide rail connection of figure 7c

Subspecies E - the guide rail connection of figure 7d

Subspecies Fⁱ - the guide rail connection of figure 7e

Subspecies G - the guide rail connection of figure 7f

Subspecies H - the guide rail connection of figure 8

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3762

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
